

PROFILE

I define myself as a passionate technology lover. I have worked more than 16 years with IT companies looking for their improvement not only in their platform performances but also improving their finances through FinOps, reducing their costs significantly and evolving their platform to the last technology available. I have participated in presales and sales, helping my coworkers improving technical point in the offers to design the best solution to our clients, I managed teams implied in multiple technologies making special effort in leading people to help them to be their best version. I always stayed in the technical side, architecting and designing solutions, implementing them, managing or making the required formation to my coworkers to maintain the platform. Don't hesitate to ask me about specific cases or examples from my experience with clients, I love sharing what I've learned.
